SUMMARY

I am an accomplished Software Testing Specialist with a proven track record of delivering high-quality software solutions. With over 7 years of experience in the field, I have developed a deep expertise in various testing methodologies, tools, and frameworks.

As a professional dedicated to ensuring the reliability and performance of software systems, I have successfully contributed to the success of numerous projects across different industries. My ability to identify defects, design effective test strategies, and collaborate with cross-functional teams has consistently resulted in the delivery of robust and user-friendly applications.

WORK EXPERIENCE

PT SIGMA CIPTA CARAKA (TELKOMSIGMA) – South Tangerang, Indonesia

Senior Software Tester (April 2016 – present)

- Design test plans that reflect all business requirements of the application and provide coverage of both positive and negative paths.
- Conduct day-to-day project coordination and support the preparation of procedures, processes, and quality improvements.
- Execute test scripts, escalate roadblocks, and prioritize defects in order to minimize defects shipped to client or production environments.
- Identifying issues, risks and benefits of existing and proposed solutions and outlining application impacts.
- Gathering, validating, and documenting business requirements.
- Supporting the UAT processes with both client and project teams.

PT ASTRA CREDIT COMPANY (ACC) – Jakarta, Indonesia

IT Quality Control (September 2015 – February 2016)

- Design test plans, scenarios, scripts, or procedures.
- Document software defects, using a bug tracking system, and report defects to software developers.
- Identify, analyze, and document problems with program function, output, online screen, or content.
- Participate in product design reviews to provide input on functional requirements, product designs, schedules, or potential problems.
- Plan test schedules or strategies in accordance with project scope or delivery dates.
